

Authors Guidelines

“Nature & Technology Journal” (**Revue Nature et Technologie**) (NATEC) is a multidisciplinary, [peer-reviewed](#) and scientific [open access](#) journal which publishes, in English or French, research papers, literature reviews, and communications that meet the general criteria of significance and scientific excellence. NATEC is biannually issued publication which consists of three sections: Agronomics and Biological sciences, Fundamental and engineering sciences, and Environmental sciences. The journal covers research studies related to the three fields including some of the allied subjects.

Authors may submit articles within these fields, related to the following topics (not exhaustive list):

A: Fundamental and Engineering Sciences

- Applied Mathematics
- Architecture/Town planning
- Automatics
- Biochemistry
- Biotechnology
- Computer Science
- Chemistry Economics
- Electrical Engineering
- Electronic Instrumentation
- Energy
- Genetics
- Geophysics
- Industrial Engineering
- Materials Engineering
- Materials Sciences
- Mechanics
- Metallurgy
- Nanotechnology
- Optics
- Physics
- Physiology and Biochemistry
- Phytochemistry
- Process Engineering
- Remote Sensing
- Renewable energy
- Signal processing
- Signal, Image and Multimedia
- Thermal transfer

B: Agronomic & Biological Sciences

- Agronomy
- Animals Sciences
- Biology
- Food Sciences
- Microbiology
- Molecular Biology and Genetics
- Mycology
- Nutrition
- Pharmacognosy
- Physiology
- Phytopathology
- Phytopharmacology
- Phytosociology
- Plant Biology
- Plant Physiology
- Vegetal Genetics
- Veterinary Sciences
- Zoology

C: Environmental Sciences

- Anthropoid's Taxonomy
- Biochemistry
- Civil Engineering
- Earth Sciences
- Ecology
- Engineering Environmental
- Entomology
- Forest Sciences
- Geo-Chemistry
- Geodesy
- Geology
- Geology / Paleontology
- Geosciences
- Hydraulics
- Hydrobiology
- Hydro-Geology
- Hydrology
- Hydrometallurgy
- Oceanology
- Pedology
- Sea Sciences
- Water Resources'

All papers must meet the criteria of originality and scientific quality. Obviously, they must also comply with style and format requirements. The paper will not be subject to further review, if the manuscript is not within the scope.

1. The structure for the article:

The text must be elaborated in Word for Windows (Word 6.0 or later) format with moderate margin, using 10 point Times New Roman letters. The optimal length of the manuscript is 6-15 A4 pages, including figures, tables and bibliography/references.

The structure of the manuscript (recommended) must generally have the following parts:: Title, names and surnames of the authors, the institution to which they belong, abstract (150–250 words with keywords /no more than six keywords/), introduction (it can be divided into some subchapters if needed), methodology applied in the investigation (it is recommended to divide /rubricate), results, discussion, conclusions and/or implications, acknowledgements (if any), references (in APA style) (the list should be arranged in alphabetical order between right brackets); appendix (if any).

The articles written in French must have abstracts in English (150-250 words) with keywords also in English. When acronym is used first time in the text its full title is presented.

All authors must take care of the language revision on their own. The work should be written in an impersonal style. The editor reserves the right to send the manuscript to be reviewed. If English is a second language for the author, please consider having the manuscript proof read and edited before submitting.

2. Editorial procedures:

- Nature & Technology Journal follows a double-blind peer review process, whereby authors do not know reviewers and vice versa.
- The submitted manuscript is acknowledged within 48 hours upon receipt.

- Upon submission, a paper will be internally assessed by some of our editors. If the paper is deemed to be of inferior quality, poor presentation or unsuitable for the journal, the submission will be rejected without full refereeing, and a rejection response will be sent to the submitting author via ASJP. The article is suitable for publication if it receives at least two positive reviews.
- The journal aims to offer the fastest possible speed of publication. The review process takes approximately three weeks for a 1st lecture, and three months to final decision.
- All contributors who do not meet the criteria for authorship should be listed in an Acknowledgements section
- The submission of a manuscript previously rejected by the journal will generally not be considered for publication until it is reformulated with a new title

4. Publication Ethics Statement

The ethic statement of our journal complies with the Principles of [Transparency and Best Practice in Scholarly Publishing](#) as described by the Committee on Publication Ethics ([COPE](#)) for Journal Editors:

a. International Standards for Authors:

Authors must:

- Certify that their manuscripts are their original work.
- Certify that all persons designated as "authors" have participated sufficiently in the work to assume responsibility for any eventual plagiarism, duplication, fabrication and falsification of data and redundant publications.
- Certify that the manuscript has not previously been published and is not currently being considered for publication elsewhere. If the authors have used the work and/or words of others | the authors must ensure that the work and/or words of others are appropriately cited or quoted and identify all sources used in the creation of their manuscripts.
- When an author discovers a significant error or inaccuracy in his/her own published work | it is the author's obligation to promptly notify the Journal editor or publisher and cooperate with the editor to retract or correct the paper.
- Notify to "Nature & Technology Journal" of any conflicts of interest.

b. International Standards for Editorial Board:

The Editorial Board must:

- Keeps information pertaining to all submitted manuscripts confidential.
- Be responsible for making publication decisions for submitted manuscripts.
- Strive to meet the needs of readers and authors.
- Evaluate manuscripts only for their intellectual content based on their novelty, technical quality, potential impact, and clarity of writing.
- Strive to constantly improve their journals.
- Maintain the integrity of the academic record. The Editorial Board must disclose any conflicts of interest and preclude business needs from compromising intellectual and ethical standards.
- Always be willing to publish corrections | clarifications | retractions and apologies when needed.

c. International Standards for Reviewers:

Reviewers must:

- Keeps information pertaining to the manuscript confidential.
- Bring to the attention of the Editor Board any information that may be a reason to reject the publication of a manuscript.
- Evaluate manuscripts only for their intellectual content
- Objectively evaluate the manuscripts based only on their originality | significance and relevance to the domains of the journal.
- Notify Science Publishing Group of any conflicts of interest.

5. License

- All publications of "Nature & Technology Journal" are available under [CC-BY Creative Commons Attribution 4.0 International](#) license which allows sharing, copying, reproduction, distribution, communication, reuse, adaptation by all means, in all formats and under all licenses.
- Any exploitation of the work or derivative works, including for commercial purposes, is possible. The only obligation is to credit the creators of the authorship of the original works, to indicate the sources and to indicate if modifications were made to the works (obligation of attribution).

This License gives:

- Nature & Technology Journal the right to develop, promote, distribute and archive the article set cited above (including, without limitation, the right to publish the work in whole or in part in any form whatsoever) and ensure the widest dissemination.
- The author (s) reserves the right to use all or part of this article, including tables and figures of his own works, providing that the appropriate recognition is given to the publisher as the holder of the copyrights, and the right to make copies of this article for its own use, but not for sale.

6. Article processing charges:

There is no submission fee neither article processing charges (APC) **or publication.**
