Charter of ethics and professional conduct

The journal **Didactiques**, as its name suggests, is interested in the field of language teaching. It is also interdisciplinary by relating its field to the fields of language sciences, educational sciences, and literature. The journal publishes original articles that undergo a double-blind evaluation process.

The Ethics and Deontology Charter specifies the rules applicable to the publication of articles submitted to the **Didactiques** journal as defined by the Ministerial Decree No. 933 of July 28, 2016, which defines the legal and ethical practices following the ethics of scientific research work. To this end, it serves as a guide to clarify the responsibility of the parties involved in the act of publication, namely the publisher, the author, and the reviewers.

1) The publisher's responsibility

- The Didactiques review is available online.
- The editor of the journal Didactiques must give increasing visibility to the articles for greater impact within the scientific community;
- The articles published by this journal are non-profit for the reader. They can be freely downloaded;
- The publisher is responsible for the publication decision and is based on the editorial policy of the journal by respecting the legal requirements in force as regards publication concerning defamation, or violation of copyright or plagiarism; the editor-in-chief may also consult the editorial board or the experts to make a final decision;
- The editor-in-chief and editorial board reserve the right to reject the submitted article if they believe that the article is insufficiently edited or does not correspond to the editorial line of the journal. This decision applies both to scientific articles relating to the theme of the journal issue and articles proposed in the "Varia" section;
- The editor ensures that the article is evaluated on its intellectual content, regardless of race, sex, origin, religious beliefs, citizenship, or political affiliation of the author;

- The publisher must not disclose any information of the content of the submitted article to anyone other than the author (s);
- For each scientific article deemed admissible, the editor and the editorial board appoint two Reviewers, following the double-blind review process;
- If a scientific article is submitted by a member of the editorial board, the latter may not participate in any discussion concerning his article. Likewise, the Editorial Board does not disclose any information regarding the treatment of their article during the review process that adheres to the principles of double-blind review.
- **The responsibility of the author**
- By submitting an article to the journal Didactiques, the author (s) guarantees / guarantee the originality of the article, he (they) certifies/certify that the article has not already been published, 'subject of a publication and that it is not simultaneously submitted in another journal;
- The author must reserve the exclusive rights of his article to the journal Didactiques until receipt of the results of the expert opinion. If the article is not accepted, the author will be released from any contract with the journal unless he decides to improve his article for possible publication;
- The author of the submitted article must comply with the rules of intellectual property in force and present an exhaustive list of references respecting the presentation guidelines of the journal.

2) **The responsibility of the reviewer**

- The Reviewer is responsible for assisting the editor-in-chief and the editorial board in making the publication decision. He must also help the author, through his explicit and logical remarks, to improve his article and to correct it;
- The Reviewer must evaluate articles submitted to him on time. In case the submitted article does not fall within his specialty, he must promptly inform the editor-in-chief of the journal;
- The Reviewer ensures the confidentiality of the information contained in the article and cannot divulge or discuss what is said there with a party other than that authorized by the editor;
- The Reviewer ensures the evaluation of the article for objectivity while adopting an evaluation based on requirements recognized in the sphere of research inherent in the field of registration of the article or other field that he considers relevant. He will advance objective arguments and evidence and avoid any biased assessment of his personal, racial, sectarian and other opinion;
